MAJESTIC PEPTIDES

Introduces: GLP Peptide Program With USA-Manufactured Compounds

Most suppliers source overseas and won't let you see their facilities. Our compounds are manufactured in a USP 797-certified USA facility, and we welcome lab visits because "trust us" is not enough.

1. Unmatched Quality & Transparency

- USA-manufactured peptides produced in a USP 797-certified facility, with third-party Certificates of Analysis (COA) for every lot
- In-person lab visits available — see the facility where your compounds are produced
- You control your exact compound mix. Flexible reordering based on actual patient demand.
- Operational, analytical support and ongoing assistance via Metis by Kevin Dixon

2. Complete Launch Support

- Complimentary 4-hour training program with Christopher McDonald, Director of Practitioner Support
- Turnkey documentation: consent templates, adverse event forms, EMR integration guidance
- Limited Time Only: Complimentary 3-month subscription to Metis peptide program service

3. Accessible Financing

- $30,000 starter package financed through PNC Healthcare Business Banking, fixed 10% APR, 5-year term (~$650/month) — decisions in 1 week, no credit check and no collateral needed
- We provide ~$650 in peptide inventory monthly that you resell to more than cover financing — minimal risk
- Revenue exceeds monthly payment from day one at target patient volumes resulting in immediate profits

Next Steps

1. Complete the Inventory Turnover Calculator to confirm your patient volume supports a 12-month or less burn
2. Review the Launch Timeline to understand the 10-day onboarding process
3. Metis will complete your peptide snapshot and profit presentation
4. Contact your Majestic Peptide representative to move forward

What Could You Make?

Revenue varies by patient mix and compound selection — but if you meet our minimum qualifications, you can expect to generate at least $60,000 in year-one revenue.

Every practice is different. See exactly what your numbers look like in under 5 minutes.
